

SMART SPIDER

EFFORTLESS & EFFICIENT
DRAIN CLEANING

The **Smart Spider** cleans all types of pipes fast and with high efficiency - even safe to use in PVC pipes. A unique tool designed specifically for pipes where the bottom or other sections are missing. Easily navigates 90 degree bends.

- Available sizes: 4" & 6". For smaller sizes in cast iron, clay or concrete pipes, use the Picote cleaning chains.
- Easily rebuild your Spider when necessary. Affordable spare parts and rebuild packages available. The tip of the leg will wear off with use - change legs after the 8mm tip has worn out. The Spider must always be operated with its spring leader for flexibility.
- Operate at a slower speed: Max 1000 RPM. Only operate with a Maxi Miller.
- Attach your **Smart Spider** to the shaft (always use a sleeve bearing). Check the rotational direction - always rotate clockwise. Position the Spider inside the pipe by manually rotating the Spider legs. Turn your Maxi Miller on (Max 1000rpm). Now start your cleaning process. Be aware of the proficiency of the Smart Spider - continuously flush the dust out of the pipe with water when in use.

HammerHead is an authorized Picote Distributor
